

Fund Objective

The objective of the TRIATHLON IP GLOBAL FEEDER FUND is to offer investors the opportunity for offshore diversification and exposure to global markets. The objective of the underlying portfolio is to achieve capital appreciation over the medium to long term. The underlying portfolio is a multi-asset flexible fund, investing primarily in global markets. There will be no limitations on the relative exposure of the underlying portfolio to any asset class.

Fund Universe

The Portfolio will apart from assets in liquid form, invest solely in participatory interests or any other form of participation in the GLOBAL INVESTORS EDGE FUND IC LIMITED. Participatory interests or any other form of participation in the aforementioned portfolio will be included only where the regulatory environment is to the satisfaction of the manager and the trustee and of sufficient standard to provide investor protection at least equal to that in South Africa. The Manager will be permitted to invest on behalf of the portfolio in offshore investments as legislation permits.

Manager Commentary

After mentioning “volatility” in my fourth quarter 2020 comments, I knew that slow-and-steady was more a “hope and a pray”. The past three months saw gains of just over 7% in USD by mid-February only end the quarter by declining to a still positive 1.6%. The Global Equities markets gyrated aggressively the whole time, with 2-3% days (up and down) happening often. So, if at all possible, I won’t mention that “V” word again.

Thinking back (a lifetime ago) about January-March 2020, very few people could have, or would have, predicted that we would still be in the firm grip of a global pandemic by now. Seemingly, when one “fire” is extinguished another flares up. For now, the consensus is that international travel (business or holiday) will remain restricted for months; maybe years! Plus, the work-from-home culture has, seemingly, performed well with many office staff expected to endure much fewer skyscraper visits going forward.

So, commercial property will be going through a massive reconfiguration over the next few years and, that may be a good thing.

Then, the US Federal Reserve and European Central Bank have made it fairly clear that western world interest rates will not be going up this year. I think that in their minds this fosters stability, but many other forces are pushing in the opposite direction. The rising USA / China tensions being one example.

On balance, however, most analysts seem to agree that many big international companies will do well from all the money printing and quantitative easing. Which, as you would have guessed, should be good for this portfolio.

The 2020’s certainly began with a roar and, while history may not usually repeat, it often rhymes.

Fund Information

Portfolio Manager:	Financial Fitness portfolios (Pty) Ltd
Inception Date of Fund:	20-March-2021
Inception Date of Class:	20-March-2021
Benchmark:	Global – Multi Asset— Flexible Mean
Classification:	Global - Multi Asset - Flexible
Underlying Fund	Global Investors Edge Fund IC Ltd (USD)

***Performance - Net of Fees**

** Returns History above one year are annualised*

The fund inception date is 20 March 2021 and performance may only be published after one rolling year.

Volatility is a statistical measure of the dispersion of returns for a given security or market index.

Tracking error is a measure of the risk in an investment portfolio that is due to active management decisions made by the portfolio manager; it indicates how closely a portfolio follows the index to which it is benchmarked.

Information ratio, is a measure of the risk-adjusted return of a portfolio. In this case, it measures the active return of the manager's portfolio divided by the amount of risk that the manager takes relative to the benchmark.

Sharpe Ratio is a measure for calculating risk-adjusted return. It is the average return earned in excess of the risk-free rate per unit of total risk. The greater a portfolio's Sharpe ratio, the better its risk-adjusted performance has been (i.e. a higher return with a contained risk profile, where the portfolio manager is not taking excessive risk to achieve those returns).

Beta is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole.

Alpha is a measure of the active return on an investment. It represents the excess returns of a fund relative to the return of a suitable benchmark.

Disclaimer and Disclosures

Collective Investment Schemes are generally medium to long term investments. The value of participatory interests or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from the manager. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The Manager retains full legal responsibility for the fund, regardless of Co-Naming arrangements. Transaction cut off time is 14:30 daily. Each portfolio may be closed for new investments. Valuation time is 15:00 (17h00 at quarter end). Prices are published daily and available newspapers countrywide, as well as on request from the Manager. IP Management Company (RF) Pty Ltd is the authorised Manager of the Scheme – contact 021 673 1340 or clientservices@ipmc.co.za. Standard Bank is the trustee / custodian – contact compliance-IP@standardbank.co.za. Additional information including application forms, the annual report of the Manager and detailed holdings of the portfolio as at the last quarter end are available, free of charge, from clientservices@ipmc.co.za. IP Management Company is a member of ASISA. A statement of changes in the composition of the portfolio during the reporting period is available on request. The performance is calculated for the portfolio. The individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax.

The portfolio may include foreign investments and the following additional risks may apply: liquidity constraints when selling foreign investments and risk of non-settlement of trades; macroeconomic and political risks associated with the country in which the investment is made; risk of loss on foreign exchange transactions and investment valuation due to fluctuating exchange rates; risk of foreign tax being applicable; potential limitations on availability of market information which could affect the valuation and liquidity of an investment. All of these risks could affect the valuation of an investment in the fund.

The total expense ratio (TER) was incurred as expenses relating to the administration of the financial product. Transaction costs (TC) relate to the buying and selling of the assets underlying the financial product. Total Investment Charge (TIC) is the value of the financial product incurred as costs relating to the investment of the financial product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the financial product and impacts the financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time such as market returns, the type of financial product, the investment decisions of the investment manager and the TER.

Annualised returns is the weighted average compound growth rate over the performance period measured. Fund returns shown are based on NAV-NAV unit pricings calculated from INET / IRESS for a lump-sum returns is the weighted average compound growth rate over the performance period measured. Fund returns shown are based on NAV-NAV unit pricings calculated from INET / IRESS for a lump-sum investment with income distribution reinvested (after fees and cost). Performance numbers and graphs are sourced from Global Investment Reporting (Pty) Ltd.

The Effective Annual Cost (EAC)

The EAC is a standard industry measure which has been introduced to allow you to compare the charges you incur and their impact on the investment returns over specific periods. You can contact clientservices@ipmc.co.za or call us on (021) 673-1340 for an Effective Annual Cost disclosure statement. Please visit <http://www.ipmc.co.za/effective-annual-cost> to address the EAC illustrator.
